Habla Ingles? Neverland Online Does Now

Posted by Christophor Rick,

October 20, 2009

Neverland Online, the hugely popular fantasy browser-based MMORPG developed by China's Oak Pacific Interactive (OPI), is now accessible to players in North America and Europe through a new English-language version that entered open beta testing on October 15. Players can register for a permanent account at <http://in.neverland.hithere.com/in1.html> and, for a limited time, log in and receive a free virtual lucky bag containing US\$100 worth of goodies.

Defeat the Demon Army with the aid of nearly 200 million pieces of equipment and a vast array of pets as you navigate through a mythical ancient Chinese world and search for the secret to immortality in Neverland Online....

Neverland Online joins Empire Craft in OPI's growing suite of English-language browser-based games published on HiThere.com. For more information, visit neverland.hithere.com.
